THE GRAVOGRAPH TOTAL SOLUTION

Over 25 global subsidiaries serving customers worldwide...

Troyes, France

Duluth, Georgia - USA

Shanghai, China

A Culture of Excellence

Gravograph is the world's leading manufacturer of rotary and laser engraving machines, materials, impact marking systems, accessories, and engraving software. For over 70 years, Gravograph has remained the industry benchmark. Our systems are the highest quality and the longest lasting. This success is built on three fundamentals: a primary focus on the needs of our customers, continually delivering state-of-the-art technology, combined with industry leading customer service from over 800 employees worldwide.

We pride ourselves on the fact that the majority of people you deal with are company employees. All Gravograph representatives receive engraving, software and materials training. Our technical support team has encountered most issues that you can possibly think of in our industry, and can therefore provide better solutions, faster. Our sales team is also trained to be solutions based, and are concerned with the real needs of the customer. The Gravograph name represents a worldwide network working around the clock (literally) to provide our customers with exceptional permanent marking solutions.

The Gravograph difference is founded on:

- a complete solutions approach: products that are designed to work individually or in harmony
- a complete technology solution: software, accessories, machines and consumables
- a complete support solution: field and telephone technical support, combined with internal and external sales consultants
- a complete training solution: on-site training, phone support, a website knowledgebase and our traveling Engravers Academy

As the leader in the global engraving and marking industry, we have tailored solutions for all applications including personalization, signage and traceability.

The comprehensive Gravograph product line includes:

- the world's largest and most innovative range of rotary engraving systems
- state-of-the-art laser engraving systems
- the world's leader in innovative engraving software designed in-house for use with Gravograph products
- the world's most comprehensive range of high quality engraving materials
- a 24/7 online storefront, the Gravostore, offering a wide range of engraving products
- versatile micro-percussion marking systems
- responsive in-house fabrication services

The total solution concept is completed by GravoStyle™, a single solution software for both laser and rotary engravers. This new generation software enables users to switch engraving technologies, and transfer between engraving applications without changing to another software program.

Gravograph develops and markets the world's highest quality, durable marking solutions to our customers, and exceeds the industry standards for product and service performance. Our global quality management system ensures that our products and services are continuously improved, and that all of our team members are dedicated to ensuring an outstanding customer experience.

WHAT MAKES OUR MATERIALS THE BEST

There are several reasons why Gravograph is the best source for engraving materials. We have the most experience in the industry, as well as the greatest number of resources to help you meet your material needs. Our educated Customer Solutions Center, 1-800 technical support line, special-order capabilities, and unparalleled QUALITY are the greatest reasons to buy your materials from us.

Quality is a somewhat vague word. Therefore, it is important that we highlight the unique characteristics which make our materials second to none.

RAW MATERIALS – All of our raw materials are 100% prime. This means that we do not use any regrinds. We only use virgin materials. This means consistent thickness and consistent color, which means consistent engraving performance.

CAP CONSISTENCY – Customers who have used both our material and competitive material continually applaud our cap consistency. This didn't happen by accident. We extrude the cap and core separately, then laminate the layers together days after each layer has cooled and solidified. Each layer is continually monitored with an advanced "gamma backscatter gauge" during the entire extrusion process. Final samples are manually "gauged" after extrusion. The cheaper way to produce the material is to marry the layers together while they are in the extrusion process. This is referred to as "co-extrusion". (See figure A). Problems with this method arise because the products are still in a molten state at this stage. While you can maintain a consistent overall thickness, the thickness of each individual layer cannot be accurately maintained.

COLOR CONSISTENCY – We only use color concentrates that are controlled to less than 1 E (a variance of 2 E qualifies as a commercial color match). A precise method of metering the color concentrate is also employed. During extrusion, the opacity is periodically tested with a calibrated densitometer, which gives a numerical value of opacity that is compared to the master value. Finally, the finished product is compared to color masters (which are classified by color and surface finish), under Macbeth color inspection lights.

Indoor/outdoor - UV Stable – Our versatile indoor/outdoor materials maintain their original color even in the toughest environments since they are UV stabilized. These materials can also be used for indoor facility signs where UV lighting can affect the color integrity, as well as properties of the plastic.

SHEET FLATNESS – Gravograph uses an in-line extrusion process, which means the material has never been in roll form. This process removes the inherent curling tendencies of rolled product. Then, the lamination process is controlled (through even temperature distribution) to produce a final flat sheet. More importantly, all our 2-ply indoor materials are actually 3-ply materials. The problem inherent with 2-ply indoor materials originates from the fact that the cap and core are made of different materials. This is true with all major engraving sheet-stock providers (not just Gravograph). What happens in this situation is that the materials are pressed completely flat during the heated lamination process, but since the two different materials have different expansion/contraction characteristics, the final product tends to curl a little as it cools. To overcome this problem, we actually put a cap on each side of the core. This layering technique balances the "pulling" from each cap, and the result is a sheet that lays flat.

Therefore, when you purchase a sheet of red/white Gravoply, the sheet is actually constructed with a red cap, over a white core, over another white cap. (See Figure B) Our outdoor sheet stock (Gravoglas 2-Plex) does not require this triple layer effect, because the cap and the core are actually made of identical modified acrylic.

WHY DO YOU CARE?

We understand the importance of color consistency, but perhaps you've never considered cap consistency as a very important trait. Well, how many times have you had to re-run a job because half-way through completion, the cutter didn't reach all the way through the cap? It's especially frustrating after a large matrixed job runs for over an hour, and you return only to find out the job has to be re-run. Trying to engrave deeper to compensate can add wear to your cutter, reduce your productivity, and "bleed" characters together. How much time have you spent trying to make a "bowed" sheet lay flat? When creating raised letter signage, how many times when weeding the profile material from the base material has it snapped into numerous little pieces requiring extra time to clean? It all comes down to the old adage: **"time is money"**.

It is worth the extra effort to provide a quality product which reduces problem engraving and maximizes your bottom line.

KNOW YOUR PLASTICS

GRAVOPLY ULTRA (p. 17)

Our most versatile product yet. This micro-cap product allows fine detailed engraving similar to a foil cap product (like Gravoply 2,) but the non-foil solid plastic cap offers more overall durability. This cap is so durable, in fact, it can be used indoor or outdoor. Even better, this fully UV stable 2-ply product can be engraved with a rotary or laser engraver. This product is available in a variety of overall thicknesses .020", .062", .090" (0.5 mm, 1.6 mm, 2.4 mm) and offers many matte and satin surface finishes to choose from. Reduce your overall inventory value by stocking just one product line for all your 2-ply needs.

GRAVOLASE (p. 18)

Similar in appearance to the Metallex product line, Gravalase uses many of the same foil cap layers. However, Gravalase uses a core of laserable solid DR plastic, instead of ABS plastic. DR is a special formulation of a modified acrylic known best for its laserability. Available in either a flexible .020" (0.5 mm) or a sturdy .062" (1.6 mm) overall thickness.

GRAVOPLY LASER (p. 19)

An indoor laserable product at a lower price. Construction of material is an acrylic core and a foil cap designed for detailed engraving. This product is offered in a wide range of colors which are laser and rotary engravable. Excellent for interior signage.

FLEXILASE (p. 20)

Flexilase™ is a high-resolution material that is flexible and engraves on rotary and CO2 laser systems. Just 0.25mm (0.01 inches) thick, Flexilase™ is ultra-flexible and an ideal solution for all your engraving needs on curved and flat surfaces. Whatever technology you use—laser or mechanical engraving—Flexilase™ offers outstanding cutting and engraving results.

GRAVOPLY 1 (p. 21)

Still our most popular product, Gravoply 1 is constructed with a standard .010" (0.25 mm) cap layer and perfect for almost any indoor application.

GRAVOPLY 2 (p. 24)

The microthin .001" (0.025 mm) foil cap of Gravoply 2 allows for very fine detailed engraving. While this is perfect for small text and/or intricate logos required of many indoor applications, the thicker cap of Gravoply 1 may be better for many industrial applications where long-term cap durability may be put to the test. Gravoply 2 comes standard with a matte surface finish, but we now have Gravoply 2 Gloss available which has a glossy clear protective cap layer.

GRAVOPLY 3C (p. 26)

3-ply "double-faced" materials typically have a cap on either side of the core, so you can engrave on either side of the material. However, this 3-ply "double-faced" material is constructed with 3 layers to be engraved from one side. The unique composition allows you to create a 3-color interior sign with your engraver. Engrave to .004" (0.1 mm) to expose the first core, and to .012" (0.3 mm) to expose the second core.

METALLEX (p. 27)

It's the plastic that looks like metal. Save weight and expense for all your indoor metallic applications! Most popular for creating badges. Available in a variety of colors and 3 surface styles. The original Metallex is constructed with a laminated metallic foil cap. Metallex 2 has a special surface treatment to add scratch resistance to the beautiful yet sensitive

metallic foil cap. Metallex Gloss has an added glossy clear protective cap layer over the metallic foil – designed for the ultimate in scratch resistance.

METALLEX 2 (p. 27)

See Metallex. Metallex 2 has an extra clear coating that is applied to add more protection to the surface.

STICKALASE (p. 28)

Available in black/white or silver/black. This .004" (0.09 mm) thick, adhesive backed laserable plastic is perfect for bar-codes, cylindrical labeling, ID plates or trophy plates. Sold in 4.72" x 32.8' rolls (120 mm x 10 m rolls.)

RUBBALASE (p. 28)

A natural rubber product sold in sheets is perfect for creating high quality rubber stamps with your laser machine.

GRAVOSTRAT (p. 29)

Phenolic is a very rigid fibrous product that can be susceptible to humidity, but is usually chosen for its fire-retardant qualities.

GRAVOTAC (p. 37)

The design of GravoTac provides the core (substrate) and cap (profile) layers separately. By outlining the desired images or text in the adhesive backed profile layer and peeling away the excess material, GravoTac creates raised letter signage compliant with Braille ADA regulations. The raised letter process is also a great way to create multi-colored signage with your engraving machine.

GRAVOGLAS 1 (p. 39)

This acrylic 2-ply is designed exclusively for subsurface engraving, and is suitable for outdoor applications. Gravglas 1 has a thin micro-cap on a very rigid clear solid acrylic core. The thin cap offers fine detailed engraving – and it is laserable too!

GRAVOGLAS 2-PLEX (p. 40)

Designed with the same .01" (0.25 mm) cap thickness as our standard indoor plastic Gravoply 1, the UV stability of Gravglas 2-Plex makes it perfect for all outdoor applications. Available in matte, glossy or textured surface finishes for surface or subsurface engraving.

GRAVOFOIL (p. 43)

Sold in sheet form, this .008" (0.2 mm) thick adhesive backed product is for use with a rotary engraver. It creates an industrial strength, permanently engraved sticker. The very flexible PVC construction allows it to conform to many product applications. This material is not suitable for laser engraving.

ACRYLIC (p. 43)

Available in clear, white, and black. Colors are often used for back plating, where you take acrylic and glue and add another material to the surface. This thickness adds to the appearance. Clear acrylic can be subsurface engraved.

VINYL (p. 44)

Used to create vinyl lettering that appears on banners, windows, autos, etc. Typically cut with a vinyl plotter machine, this single-ply adhesive backing material is perfect for almost any outdoor application. Available in .0032" (3.2 mil) thick calendered vinyl, or .0055" (5.5 mil) thick reflective vinyl. Sold in full rolls only.

KNOW YOUR METALS

GRAVOMETAL PREMIUM BRASS (p. 30)

Now available for a variety of applications. Gravometal has a thin protective lacquer coating to protect the surface from oxidizing over time, but is only suitable for indoor environments.

GRAVOBRASS PREMIUM EXTERIOR BRASS (p. 31)

Gravobrace Exterior is a solid raw brass typically used for office building exteriors, commonly called "Doctor Plates". If you do not want the appearance of aging or oxidizing brass, it will be necessary to coat the final engraved (and likely paint-filled) product with an exterior-grade clear lacquer before or soon after mounting.

GRAVOSTRAL (p. 32)

The cap is metal, the core is Phenolic. Perfect for quality interior metal signage. The .010" (0.25 mm) aluminum caps cover a black Phenolic core. You will never need to paint fill this metal product after engraving. This product can save you time and money.

GRAVOXAL (p. 33)

This solid sheet of aluminum has an anodized surface. The anodization colors the actual metal to a depth of .001" to .002" (0.025 mm to 0.05mm) and is typically more durable than a painted surface. For this reason, anodized aluminum is often used for industrial applications requiring a durable surface finish.

While anodized aluminum can be engraved with a laser engraver, an engraved contrast will only be realized with gold, black, or colored anodizing. The silver version has a clear anodization.

ALUMAMARK (p. 34)

This special line of anodized aluminum produces black characters when lasered with any standard CO2 laser engraver. No oxidation or paint fill needed. Available in matte silver, satin silver and satin gold in thicknesses .005" (0.127 mm) and .020" (0.508 mm). Also available with adhesive backing.

COLORLED STEEL (p. 35)

Colored Steel is actually a brass-plated steel product designed for use with a laser machine. This product returns a brilliant gold lettering when engraved with a laser engraver. The clear layer of lacquer under the polyester-based top coat or paint protects the brass from oxidizing for years to come. The great appearance and low price have made Colored Steel a favorite of trophy shops using laser engravers. Since the top coating is painted with a polyester-based paint, the surface is sublimation-receptive for dye-sublimation transfers. The masking on this product is clear, so you can print your dyes directly through the masking for easier clean up. Sublimation images work best with white, silver or gold colors.

MARBLED STEEL (p. 35)

Built just like our Colored Steel (above), the final layer of paint on marbled steel is a faux marble pattern. All the other great properties of Colored Steel remain the same on this version of Colored Steel.

COLORLED ALUMINUM (p. 36)

This aluminum has been painted with a polyester-based paint. It is the preferred choice for economical trophy plates. Since top coating of Colored Aluminum is painted with a polyester-based paint, the surface is sublimation-receptive for dye-sublimation transfers. The masking on this product is clear, so you can print your dyes directly through the masking for easier clean up. Sublimation images work best with white, silver or gold colors.

TROPHY BRASS (p. 36)

An economical brass alternative for signs, trophy plates, awards and plaques designed for use with a rotary engraving machine. Trophy Brass can provide you the rich appeal of engraved brass without the associated cost.

FABRICATION SERVICES

SAVE LABOR, TIME AND MONEY

Beveling

Beveling is the cutting of an attractive angular edge in order to create a border. Our standard bevel is at a 45 degree angle.

Drilling holes

To accommodate your mounting needs in plastic and metal.

Holes are positioned per your specifications. When measuring holes, follow the illustrated example shown below.

Supply these four measurements:

1. From the center of one hole to the center of the other hole.
2. From the center of the hole to the top edge of the material.
3. From the center of the hole to the side edge of the material.
4. Diameter of any counter-sunk holes to be drilled (for mounting materials and wall holders with flat head screws.) Please ask for a quotation.

Rounded corners

We offer a wide selection of different radii for rounded corners.

Slotting

For acrylic material. Specify position, angle and width of slot.

Bending

Plastic materials 1/16" (1.6 mm) or thicker (except Phenolic) can be bent into stand-up display signs, badges etc. Maximum length of the bend is 18" long (457.2 mm). Please ask for a quotation.

FABRICATION SERVICES

Adhesive backing

We can apply adhesive backing to badges, nameplates, strips and sheets. Adhesive backing is applied before cutting material. Please specify interior or exterior use.

Magnetic backing

For temporary mounting of info tags on metal shelves, we can apply magnetic backing to plates, strips and sheets.

Custom solutions

We also deliver cut to size self-adhesive signs in a matrix on a carrier material: • engrave it • take it off • stick it on. For more information, please contact us.

Polishing

Acrylic cut edges can be polished into smooth lustrous finished edges.

Determining linear inch:

$2'' + 8'' + 2'' + 8'' = 20$ linear inches

$50 \text{ mm} + 200 \text{ mm} + 50 \text{ mm} + 200 \text{ mm} = 500$ linear mm

8" / 200 mm

8" / 200 mm

Custom color plastic material

Gravograph provides exclusive color matching services!

Although we offer the largest selection of engraving materials, we understand our customers' special requirements. Gravograph is able to supply proprietary material based on your specifications: color, material, thickness and ply.

If a large job calls for a special color combination, please contact us.

Lead-time

All fabrication orders are custom orders. Many orders ship within one business day. Custom orders may require additional time. Fabrication times are only an estimate, and may vary according to production load. Orders can be rushed for an additional fee.

Return policy

All fabrication orders are non-returnable due to their custom nature. Please ensure that you provide accurate information when placing your fabrication order.

FABRICATION SERVICES

...ready to engrave badges

Just like our other cut to size items, badges are available in most of our engraving materials. Our badges include fasteners. Just specify your requirements: size and material, fastener, fused, cemented or bonded hardware; rounded or square corners; with or without beveling.

Types of fasteners

A. Safety pin

A

B. Clutches

B

C. Magnetic

- Standard
- Jumbo

C

D. Superclip

D

E. Snap clip, swivel

E

Please note:

1/16" (1.6 mm) badges are bonded

3/32" (2.4 mm) badges are fused

We can custom fabricate your plastic or brass sheet badge. Specify: shape, size and material, fastener, fused, cemented or bonded hardware; rounded or square corners; bevel or no-bevel finished edges.

Please contact our Customer Service Department for a quotation.

Custom fabricated badges and signage

For information on ready-made badges, see pages 55-57

CUT TO SIZE

Circular and oval blanks are available from our current range of engraving materials. Custom sizes are available.

Cutting of concave corners

Signs with concave corners
Available in cut to size pieces of Gravoply 1, Gravoply 2, Gravoply Ultra, Gravoxal, Metallex, Gravoglas, Gravalase and Gravoply Laser to label push-buttons, etc.

CIRCULAR BLANKS

Custom sizes are available with or without holes.

CUTTING

Custom cutting is available for Gravoply 1, Gravoply 2, Gravoply Ultra, Gravoxal, Metallex, Gravoglas, Gravalase, Gravoply Laser and GravoTac.

OVAL BLANKS

Custom sizes are available with or without holes.

CUSTOM COLORS ON DEMAND GRAVOPLY 1

- Choose over 1,100 color combinations
- Four surface finishes available
- Over 4,600 specific products

Colors

Why follow the mainstream? Now you can choose engraving sheets in your own color combination! Just combine any of the cap colors with the core color of your choice. This great feature gives you over 1,100 color combinations of GravoPLY 1 from which to choose.

Surface finish

We don't want to limit your imagination. This is why we let you choose your final surface finish as well. Choose from our standard satin, matte, textured, or glossy surface finishes. Now, together with surface finishes you have over 4,600 specific products to choose from in the GravoPLY 1 "On Demand" range.

Delivery & pricing

"On Demand" products require 6-8 weeks* for delivery, and have a nominal up charge over our standard stock products for orders of 5 sheets or more. Quantity breaks will also apply to our "On Demand" products. They may be shipped in full, half or quarter sheets, but must be ordered in full sheet equivalents. For example, half sheets must be ordered in pairs and quarter sheets must be ordered in sets of 4.

* Large quantities may require more than 6-8 weeks for delivery. For delivery/pricing/minimum • Please call 1-800-843-7637 for information.

Gravoply Ultraglow

HIGH PERFORMANCE

Photoluminescent

Please note:

This product allows for a white engraving in the photoluminescent surface. The thickness of 1/32" (0.8 mm) allows profile letters to cut for ADA signage applications. The glow times for this product meet the New York State requirements and conform to the following: ISO:10012-1. Other thicknesses and core colors are available through our Custom Services/On Demand. See pages 15-16.

Matte 2-ply

Metallex products have a laserable foil cap.

When engraving with a laser, please take care to not engrave deep into the ABS core.

Metallex is not optimized for laser cutting. Laser cutting is possible by making multiple passes in lower power settings.

STICKALASE®

ADHESIVE MATERIAL FOR LABELS

- Labels
- Bar codes
- Trophy plates

Available in black/white or silver/black, this .004" (0.09 mm) thickness, adhesive backed, laserable plastic is perfect for barcodes, cylindrical labeling, ID plates, or trophy plates. Use your CO2 laser engraving machine to engrave and/or vector cut custom shapes from flexible and durable material.

RUBBALASE

- Rubber stamps

Natural rubber sold in sheets, exclusively for lasering with CO2 laser engraving machines to create inking stamps. Gray in color. .087" (2.2mm) in thickness.

Size of sheet: 8.27" x 11.69" or 210.06 mm x 296.93 mm.

Natural Rubbalse Sheet

19897

Specifications

Color	Gray
Thickness	.087" (2.2mm)
Standard size (sheet)	8.27" x 11.69" (210.06 mm x 296.93 mm)

For preferred laser parameters, see pages 8-9.

GRAVOSTRAT[®] Phenolic

Industrial identification

- Phenolic material
- Low glare finish
- 3-ply
- Resistant to chemicals and solvents
- Non-flammable
- Conforms to USA military specifications ASTM D 709 ES-1, ES-2, ES-3, L-P-387
- Electrically non-conductive and abrasion resistant
- Saw cut
- Interior use
- Adhesive okay on quarter sheets only
- Bevel - yes

The GravoTac process

Step 1

Adhere 1/32" (3.2 mm) profile material to 1/16" (1.6 mm) or 1/8" (3.2 mm) substrate. Engrave using outline font.

Step 2

Weed (peel) 1/32" (3.2 mm) profile material off substrate.

Step 3

Results: A patented process for producing ADA compliant signage.

Within the continental US call +1.800.843.7637

Outside the continental US call +1.770.623.0331

Gravoply Ultraglow

HIGH PERFORMANCE

Photoluminescent

Please note:

This product allows for a white engraving in the photoluminescent surface. The thickness of 1/32" (0.8 mm) allows profile letters to cut for ADA signage applications. The glow times for this product meet the New York State requirements and conform to the following: ISO:10012-1. Other thicknesses and core colors are available through our Custom Services/On Demand. See pages 15-16.

Acrylic Sheets

Can be engraved, paint filled, or used for cut-outs. Another common use is to simply add thickness to an engraved sheet of metal or plastic. The added thickness has a stronger presence on the wall – especially helpful if the sign is not framed.

Use acrylic to add thickness to metal and plastic signs

For preferred laser parameters, see pages 8-9.

SETTING BRAILLE PROFILE CUTTERS TO ZERO

This procedure is a one-time operation performed before using a new Braille profile cutter. This is a best practice that will improve productivity. It will allow changing cutters without having to re-adjust the micrometer. The Braille Profile cutter is for cutting the raised shapes. The spindle spring tension should be adjusted to allow about 1/8" (3.18 mm) spring action.

1. Turn the micrometer gauge in the direction of increasing numbers until it stops
2. Back off 4 full turns to 0. Then back off an additional 10 ticks on the micrometer. Tighten the micrometer set screw.
3. Screw in the Braille Profiling tool (blue label) making sure cutter tip is not sticking out of the nose cone. You may need to adjust cutter offset with the yellow cutter wrench.
4. Using the arrows on control pendant, move spindle over flat table.
5. Press Z on the control pendant. (LCD reads Z=0.000 inch ⚡ to change)
6. Press the down arrow on control pendant until the nose cone touches the table (& there is a slight separation between the snap ring and spindle assembly).
7. Then loosen the black set screw on the brass collar of the cutter (using yellow wrench) and carefully lower the cutter until it just touches the material. Tighten set screw.
8. Press check ✓ on the control pendant (spindle raises up). Press X to cancel the XY jog mode.
9. Remove tool.
10. Dial the micrometer back (decreasing numbers) 1 full turn + 10 ticks to read 0.

SETTING BRAILLE DRILL CUTTERS TO ZERO

This procedure is a one-time operation performed before using a new Braille drill cutter. This is a best practice that will improve productivity. It will allow changing cutters without having to re-adjust the micrometer. The Braille drill cutter is for drilling holes for the Braille beads. The spindle spring tension should be adjusted to allow about 1/8" (3.18 mm) spring action.

1. Turn the micrometer gauge in the direction of increasing numbers until it stops
2. Back off 4 full turns to 0. Then back off an additional 18 ticks on the micrometer. Tighten the micrometer set screw.
3. Screw in the Braille drill tool (red label) making sure the cutter tip is not sticking out of the nose cone. You may need to adjust cutter offset with the yellow cutter wrench.
4. Using the arrows on control pendant, move spindle over flat table.
5. Press Z on the control pendant. (LCD reads Z=0.000 inch ⚡ to change)
6. Press the down arrow on control pendant until the nose cone touches the table and there is slight separation between the snap ring and spindle assembly.
7. Then loosen the black set screw on the brass collar of the cutter (using yellow wrench) and carefully lower the cutter until it just touches the material. Tighten set screw.
8. Press check ✓ on the control pendant (spindle raises up). Press X to cancel the XY jog mode.
9. Remove tool.
10. Dial the micrometer back (decreasing numbers) 1 full turn + 18 ticks to 0.

Recommended ADA sign materials: Gravotac, Gravotac Exterior, 2 Plex, Gravoglas 1 & 2

MODULAR FRAME SYSTEM

Designed for interior signage. Frame construction provides flexibility for installations and sign inserts. Signs change over easily. Sign inserts fit securely into frames with a snap lock mechanism. Frames and inserts are tamper-resistant.

I. Modular frame directory

- A.** The header and base are 3" x 18", sold as a set. Insert panels are 2" x 18", sold separately.
- B.** Use as many insert panels as necessary to create the desired directory size. Snap locks and hardware included.

See chart at bottom of page 48 for part numbers.

II. Ceiling/wall mount

- C.** Designed to mount modular frames perpendicular to walls and ceilings. Instructions included.

When fabricating sign inserts, allow .005" to .010" for expansion and contraction of integrated materials.

Frame design

Features 2 reveals. The front reveal gives sign inserts a recessed look. The back reveal provides a projected appearance.

Snap lock mechanism

Positive locking snap locks fit securely into the frame hole. Each snap lock has a pressure-sensitive adhesive tab to hold insert in place. The exclusive hole placement and snap lock system provides design flexibility for sign inserts.

Mounting

Pre-grooved back reveal ensures tape concealment. Mounting

holes accommodate standard hardware for various types of wall installations.

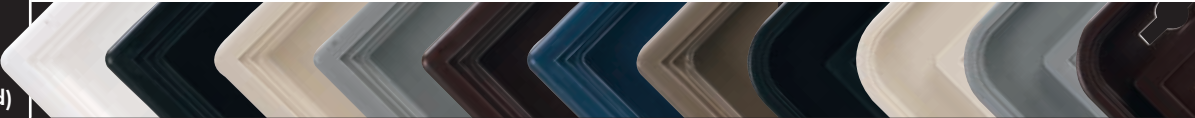

Frame format

All frames, directories and deskbars except white, navy, and taupe are available in round and square corners, and accommodate sign inserts which allow the maximum yields from our 24" x 48" standard sheet sign materials.

Custom modular frames

We offer white, black, almond, navy, taupe, gray and brown. Custom colors and sizes are available. Subject to minimum order requirements.

Regularly stocked items have a lead time of 4 weeks. Special order items have a lead time of 4-6 weeks.

Recommend 1/16" inserts; round corners are 1/2" rounded corners.

ALUMINUM MODULAR FRAME SYSTEM

Aluminum frames incorporate "picture frame technology" for incredible flexibility with unlimited sizing. Pre-cut lengths are stocked in many sizes for quick assembly.

Custom sizes are available at no extra charge. Perfect for indoor or outdoor signage. Available in 2 edge designs and 3 colors. Frame legs are sold in pairs, complete with corner attaching hardware. You will need 2 pairs to complete a frame. This unique construction method will allow you to offer countless size combinations to your customers, with minimal inventory. The 17 sizes available will allow you to create over 150 different sign frame dimensions.

For example if you want a 4" x 10" frame, simply purchase one of part number 34717 (4" pair of silver 100 series) and one of part number 34723 (10" pair of silver 100 series). You will receive everything you need to construct a silver 4" x 10" thin edge frame. For only \$1 per frame, we will construct them for you.

TWO EDGE STYLES

SERIES 100

Features a thin edge with the sign insert recessed into the frame.

FEATURES:

- Custom sizing
- Lightweight and durable
- Frames can accept a variety of substrates; aluminum, plastics, etc.

SERIES 200

Features a 3/16" radius edge design that matches our high-impact styrene frames and a front reveal that allows the sign insert to have a slightly recessed appearance

- Sign inserts are easily changeable and can be modular
- Concealed mounting
- Easy installation with either screws, tape, or velcro
- Easy sign removal for building maintenance such as painting walls

SUPPORT BRACKETS

Support brackets are available for use with larger signs and when modular sign inserts are used. Support brackets are available in frame sizes.

SNAP LOCK MECHANISM

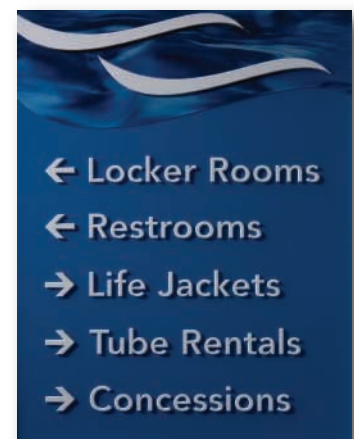

Each snap lock has a pressure sensitive adhesive tab to hold the sign face securely in place within frame and provide tamper-resistant signage. Snap locks allow for easy sign face insertion, removal, and replacement.

MOUNTING

Frame back is designed for tape concealment. Mounting holes can be added to accommodate standard hardware for various types of installations.

Use the series 100 Framing System for "the frameless look." Cut filler piece of material to fit inside the frame - adhere larger shape to filler piece to hide edges of frame. Use snap locks on filler piece to hold into frame.

ALUMINUM MODULAR FRAME SYSTEM

When fabricating sign faces, allow .005" - .010" clearance for expansion and contraction of materials.

Edge size	Series 100			Series 200			Support (Silver only)
	Silver	Black	Gold	Silver	Black	Gold

8.5"	34732	34766	34800	34749	34783	34817	35084
9"	34722	34756	34790	34739	34773	34807	35074
10"	34723	34757	34791	34740	34774	34808	35075
11"	34724	34758	34792	34741	34775	34809	35076
12"	34725	34759	34793	34742	34776	34810	35077
15"	34726	34760	34794	34743	34777	34811	35078
18"	34727	34761	34795	34744	34778	34812	35079
24"	34728	34762	34796	34745	34779	34813	35080
30"	34729	34763	34797	34746	34780	34814	35081
36"	34730	34764	34798	34747	34781	34815	35082
48"	34731	34765	34799	34748	34782	34816	35083

Each part number above includes a pair of frame legs in the length mentioned and a pair of corner attaching hardware. Therefore, two part numbers are needed to complete a frame. For only \$1 per frame, we will construct them for you.

FOR ALUMINUM MODULAR FRAMES, ORDER SNAP LOCKS SEPARATELY.

Ready-made frames in the most popular sizes

Frame size	Series 100			Series 200		
	Silver	Black	Gold	Silver	Black	Gold
4" x 8"	34851	34857	34863	34854	34860	34866
6" x 6"	34852	34858	34864	34855	34861	34867
8" x 8"	34853	34859	34865	34856	34862	34868

Each part number above includes the complete frame fabricated in the overall dimensions listed above. Recommend: 1/16" inserts; snap locks optional.

36353 Snap lock with adhesive (set of 12)

36351 Suction cup (1-3/4" diameter)

Insert sizes

The frame sizing is equivalent to our existing modular frame system, so the insert size should always be 5/64" less than the size of the frame leg purchased. For example, a 6" x 8" frame would need a 5-59/64" x 7-59/64" insert. This is because an insert should always have .005" - .010" clearance for expansion and contraction of materials.

SLATZ SIGN SYSTEMS

Excellent for interior or exterior upscale signage

Our exclusive Engraver's Sign System combines silver and gold aluminum shapes and injection-molded plastics into a unique system of interchangeable components for single signs and directories. Some assembly required. Simply engrave the inserts, snap into place, and your interior sign system is ready for installation.

Note: We will manufacture custom size directories to your specifications. Call for pricing.
Recommend: 1/32" or 1/16" inserts, no thicker than 1/16"

Components

We chose the sizes most often specified by architects and facility managers. All directories can be rearranged to accommodate multiple insert formats. Simply arrange insert plates to accommodate your specified format.

All directions and signs feature molded plastic multi-clips inserted into their tracks. Backplates and trimplates then snap-fit onto the multi-clip ensuring accurate spacing, design flexibility and tamper-resistance.

Removal key:

Individual insert plates of the directory may be removed from the front of a sign or directory without disturbing an entire group of insert plates.

Part no.
34870

**End caps:**

Used for wallplate and deskbar, the black cap snap-fits into the back of the backplate, covering the exposed edges and concealing the preformed mounting hole.

Part no.
49008

**Insert plate:**

Extruded aluminum which snap-fits into multi-clip system.

DID YOU KNOW?

Did you know you could use your Gravograph engraving machine to make custom ID plates or legend plates from a standard sheet of engraving plastic? You can even order the plastic sheet stock with an adhesive back already applied, so after engraving you can just peel-n-stick the plates. The GravoStyle™ software can even allow you to import a file with a list of names, and have them automatically updated to a matrix of plates. Best of all, engraving your own ID plates can cut the cost of a typical \$1.00 plate down to pennies.

LEGEND PLATES

The safe, effective way to label push-buttons, selector switches or indicator lights. All Gravoply and Gravoply Ultra legend plates are non-conductive. We're able to manufacture custom legend plates based on your specifications. Please request a quotation.

READY-MADE BADGES

Meets Military Specifications

MILITARY BADGES

Plastic for rotary engraving

These badges have been created specifically to meet the requirements of each branch of the military, regulation colors and sizes. Each is made from 3/32" Gravoply I with feature clutch fasteners (included).

Color	Size	Branch	Part no.	Qty of 50 part no.
Satin Black/White	1"x3"	Army	35527	68955
Satin Black/White	3/4"x3"	Navy	19393	68956
Satin Air Force Blue/White	5/8"x3-3/16"	Air Force	35537	68957
Matte Black/White	5/8"x3"	Marine Corps	35521	68958
Textured Black/White	1"x3"	Military	35518	58959

Metal for rotary engraving

The premium and value United States Air Force dress uniform badges. With overall dimensions of 3/4" x 3", these badges are constructed of a .025" silver nickel-plated brass shell (premium) or silver nickel shell (value) that wraps around an attaching plastic insert, as specified by the US Air Force. The attaching hardware on the plastic insert is prong and clutch type. Each unit is sold with the adhesive-backed plastic back unattached to the shell to simplify the engraving process. Clutch hardware is included.

For this specific badge, the USAF requirements dictate the engraving be done with a .030" or .040" tip cutter. (We recommend a .030" tip cutter, sold below, engraved to a depth of .008" to .010".) The text must be all in capital letters, and be 1/4" in height. The font used must be standard block or SL513 Portuguese font. As specified by the USAF, the text on the badge is to be engraved and paint-filled with a specific blue engraving enamel, purchased separately (see below).

Description	Size	Part no.	Qty of 50 part no.
USAF Premium uniform name tag (brass)	3/4" x 3"	35604	68960*
USAF Value dress uniform name tag (nickel)	3/4" x 3"	66424	68961*
Brass cutter for 11/64" shank	.030" tip	34028	
Blue engravers enamel	1/2 pint	32814	
Paint-fill squeeze tool		36226	

* Kit includes 34028, 32814, 36226

Plastic for laser engraving

Each of these 3/32" Gravoply Ultra badges also meet the requirements of the specified military branch, but are designed specifically for laser engraving. All badges feature prong and clutch attaching hardware.

Color	Size	Branch	Part no.	Qty of 50 part no.

* Reference for orders of 50 or more. Includes clutch back.

METAL BADGE FRAMES AND MAGNETS

Deluxe metal badge frames

Similar to the above badge frames, but with slightly larger dimensions and upgraded finishes. The gold badges are actually 18K gold-plated, and the silver badges are plated with stainless steel. Since they both have a solid steel core, magnets adhere directly to the body of the badge, with no need for a pressure-sensitive steel plate. Sold with or without pin back fasteners. Both sizes offer round corners. Plain frames do not include fasteners, and can be used with the magnetic clips sold below. Insert material must be 1/32" thickness only.

3-line deluxe badge

Frame size: 1 5/8" x 2 15/16"

Insert size: 1 3/8" x 2 3/4"

1/8" radial corners

Plain gold (frame only)	35617
Pin back gold	35624
Plain silver (frame only)	35619
Pin back silver	35625

3-Line deluxe badge

2-line deluxe badge

Frame size: 1 1/8" x 3 1/8"

Insert size: 29/32" x 2 29/32" x 1/32"

1/8" radial corners

Plain gold (frame only)	35616
Pin back gold	35622
Clutch back gold	35623
Plain silver (frame only)	35618
Pin back silver	35628
Clutch back silver	35629

2-Line deluxe badge

Metal badge frames

Engrave before mounting in frames. Materials not included; frame only. Material must be 1/32" thickness only.

Square corners:

Frame size: 1 1/16" x 2 11/16"

Insert size: 1/2" x 2 1/2" x 1/32"

Goldtone w/pin back	35620
Silvertone w/pin back	35626
Goldtone w/clutch back	35621
Silvertone w/clutch back	35627

Magnetic closures

The following items are listed in ascending order of magnetic strength.

Description	Part no.
A. Single magnetic clip	36119
B. Double magnetic clip	36118
C. Double post magnetic clip	36112
D. Triple post magnetic clip	36113
E. Economy badge magnet	36109
F. Poly badge magnet	36110
G. Mini poly badge magnet	36111

All magnetic closures come with the pressure-sensitive adhesive backing.

BADGE HARDWARE

Pressure-sensitive hardware

We offer our best-selling and new hardware with pressure-sensitive adhesive backing. Simply peel back the liner, and the adhesive bonds to the badge blank without chemical or heat fusing.

Description	Part no.
A. 1" safety pin (silver)	36099
B. 1 1/2" safety pin (silver)	36104
C. 2" ribbon bar	35691
D. 2 3/4" ribbon bar	35689
E. Brass clutches	19351
F. Badge tack	35687
G. Synthetic clutch	35970
H. Swivel metal bulldog clip	36106
I. 1 1/2" clear pin (steel) with ABS base	36103
J. 3/4" alligator clip swivel with ABS base (packs of 100)	36108
K. Drapery pin	36102
L. Super clip	36117
M. 1 1/2" white safety pin	36091

Classic badge hardware

Hardware is nickel-plated brass. Features clear plastic backing to make bonding quick and easy without GravoBond (see page 82 for adhesives). Anti-tarnish finish protects fabric from discoloration. Choose the material color, ply and thickness for fabricating badge blanks.

Description	Part no.
A. 1 1/2" white safety pin	36090
B. Brass safety pin import (pack of 100)	19345
C. Metal safety pin USA (not shown)	36089
D. Safety pin for Phenolic only with no plastic backing (not shown)	36071
E. 2" plastic ribbon bar	35690
F. 2 3/4" plastic ribbon bar (not shown)	35688
G. Brass clutches	19351
H. Tacks	35686
J. Synthetic clutch (pack of 100)	35970
K. Metal bulldog clip for badge blanks 1" or higher	36092
L. Swivel clip w/plastic back	19346
M. Snap clip w/plastic back	30361
N. Pocket clip on	35692
O. Clear acrylic badge holder	35693
P. 1 1/2" clear pin (steel) with ABS base (packs of 100)	36088

Badge Adapters

P. Adapter w/pearlized snap and spring clip (packs of 100)	36252
Q. Adapter w/spring clip	36098
R. Badge adapter w/alligator clip	36097
S. Spring clip with 3 1/2" Photo ID strap (packs of 100)	36100

AWARD PLAQUES

The engraving material leader now has the best wood plaques in the industry. Choose from wood-grain or marble finish. All are created with laserable foils (not laminated paper) for the greatest quality and durability. The laserable wood grain plaques simulate a solid walnut plaque with a deep cherry stain, and are available with or without a solid black edge border. The marble finish plaques are constructed with a concave edge, and available in black, white, red or deep blue. Each of the marble finish plaques is available with or without an attractive gold trim border.

Thickness for all award plaques is 5/8".

LICENSE FRAME PLASTIC INSERT MODELS

These license frames are designed to hold your engraved plastic inserts. All plastic frames are rotary engravable only.

Plated Zinc Frame

A. Chrome - 62410

Black - 62414

Brass - 62409

Top Center Recess Area: Up to 6-5/16" W x 3/4" H (159.85 mm W x 18.5 mm H)

Bottom Recess Area: Up to 10-5/16" W x 15/16" H (261.5 mm W x 23.5 mm H)

B. Chrome - 62411

Black - 62415

Top Center Recess Area: Up to 6" W x 7/8" H (151.9 mm W x 22.1 mm H)

Bottom Recess Area: Up to 7" W x 7/8" H (178.5 mm W x 22.1 mm H)

2-Ply Metallized Plated Plastic Frame

C. Chrome - 62428

The suggested max. imprint area on the Top rim is 6-1/4" W x 5/8" H

The max. imprint area on the Bottom rim is 11" W x 7/8" H

D. Chrome - 62427

The suggested max. imprint area on the Top rim is 11" W x 3/8" H

max. imprint area on the Bottom rim is 6-1/4" W x 7/8" H

2-Ply White Plastic Frame

E. Glitter Black - 62430

Max. imprint area on the Top rim of 6-1/4" W x 1/2" H

The max. imprint area on the Bottom rim of 7-1/4" W x 7/8" H

2-Ply Plastic License Frames

F. Chrome with Blue Frame - 62420

62420, 62421, 62422, 62423 & 62424 frames have a max. imprint area on the top rim of 6-1/4" W x 1/2" H | Max. imprint area on the Bottom rim of 11" W x 7/8" H

Zinc Engravable License Frame Models

Chrome Plated and Black Coated Zinc Alloy License Frames are ready for Laser Engraving, Rotary Engraving, and Diamond Etching. Rotary Engraving will require an Epoxy color fill. All metal automotive accessories can be CO₂ or YAG laser engraved by using TherMark coating or paste.

G. Chrome - 62481

Max. imprint area on the Top rim of 11" W x 3/8" H | Max. imprint area on the Bottom rim of 11" W x 7/8" H

H. Black - 62482

Max. imprint area on the Top rim of 6" W x 7/8" H | Max. imprint area on the Bottom rim of 11" W x 7/8" H

Brass Engraving License Frame Models

I. Black Nickel - 62466

Max. imprint area on the Top rim of 6" W x 7/8" H | Max. imprint area on the Bottom rim of 11" W x 7/8" H

J. Chrome Plated Solid Brass - 62450

Max. imprint area on the Top rim of 6" W x 3/8" H | Max. imprint area on the Bottom rim of 11" W x 7/8" H

METAL MOTORCYCLE LICENSE FRAMES FOR PLASTIC INSERTS

K. Chrome - 62487

Black - 62490

Dimensions: 7-1/2" W x 5" H | Top Center Recess Area: 6-3/8" W x 0-3/8" H | Bottom Recess Area: 6-3/8"

L. Black - 62487

Dimensions: 7-3/16" W x 5" H

Top Center Max. imprint area: 6-1/2" W x 3/8" H | Bottom Max. imprint area: 6-1/2" W x 1" H

M. Chrome - 62487

Dimensions: 7-7/16" W x 4-11/16" H

Top Center Max. imprint area: 6-3/4" W x 3/16" H | Bottom Max. imprint area: 6-3/4" W x 1/2" H

Metal Motorcycle License Frames

N. Chrome Plated Solid Brass - 62493

Top Center Max. imprint area: 6-1/2" W x 1/2" H | Bottom Max. imprint area: 6-1/2" W x 1" H

Personalize with Dedicace™, see page 112.

Metal Motorcycle License Frames

Dimensions: 7-1/2" W x 5-1/16" H

*N. Chrome Plated Solid Brass - 62493*

Top Center Max. imprint area: 6-1/2" W x 1/2" H | Bottom Max. imprint area: 6-1/2" W x 1" H

**Hitch Covers & Front Plates**

Trailer Hitch Covers (with either a 2" or a mini 1-1/4" receiver post) & Front Plates are ready for Laser Engraving, Rotary Engraving and Diamond Etching. Rotary Engraving will require an Epoxy color fill.

*O. Chrome Plated Oval Emblem & Stainless Steel - 62587*

2" Receiver Post Oval Emblem Size: 6" W x 3-1/4" H

P. Chrome Plated Rectangular Emblem & Stainless Steel - 62589

2" Receiver Post. Rectangular Emblem Size: 6" W x 3-1/4" H

Metal Motorcycle License Frames

Dimensions: 7-1/2" W x 5-1/16" H

*Q. Stainless Steel Front Plate - 62591*

Mirror Polished 800 Stainless Steel Front Plate (12"W x 6"H) | Suitable for Laser Engraving or Diamond Etching.

KEYCHAIN MODELSAll Keychains are Metal or are combined with Leather. A select few have Swarovski® Crystals or light up features. Keychains can be rotary diamond, CO₂ laser (with TherMark) or YAG laser engraved.

CONFIGURE SCANNER

Scan the barcodes on the right from top to bottom to setup scanner

Barcode Scanner

63059 Metrologic USB barcode scanner

This scanner may be used to quickly, easily, and reliably open laser files from this catalog. The laser operator only needs to scan the product barcode in the catalog and the correct file will be opened. The file contains details on required jig, speed, power, and lasering suggestions.

Scan the barcodes (on this page) from top to bottom to configure scanner.

The scanner will only open files that are in the default directory (the directory that comes up when you pick File, Open).

To prevent this directory from being accidentally changed (particularly in a multi-user environment), we suggest you locate your Gravostyle.ini file (usually in C:\GravoStyle5200\Config), right click, choose Properties, and select the Read-only property.

The barcode scanner will not function at all if Caps-Lock is on, so be sure to check this if you are having trouble.

Enter Configuration Mode

Exit Configuration Mode

Laser Bed Alignment

63085 Laser Alignment Plate

Laser Bed Alignment

1. Place the alignment plate in the top left corner of the laser bed
2. Run this file
3. Measure the offset between the box you lasered, and the box that was already lasered.
4. Turn the laser off, then back on.
5. As soon as the word "Gravograph" appears on the display, press and hold the X button.
6. Select the option "ReAlign Machine"
7. Select the option (ReAlign X Y)
8. Increase or decrease the X and Y values by the offset you measured
9. Press the check button, it will beep if the new values are accepted.

Troubleshooting:

If your machine will not allow the offset you need to enter, you'll need to reset your fence.

In the package of tools that arrived with the machine, there will be an allen wrench that will fit the screws along the rulers on the X and Y axis.

Move the rulers as far in as possible. Run your red light along each axis to ensure the rulers are secured straight.

Corner Jigs

63066 1/4, 1/2, 3/4 jigs

These jigs are used (as shown in the photo below) when engraving the product.

Font Plaque

63017 Small plaque 5 1/2\"w x 7 1/4\"h

This plaque can be personalized with the fonts of your choice to show the font options available for personalization.

ENGRAVING SUPPLIES

Tapes and Adhesives

Exterior double-coated foam tape

Cross-linked, closed cell white polyethylene foam coated with high tack, high shear acrylic adhesive system. Good chemical and fuel resistance. Adhesive performance is excellent for mounting applications. Use to attach signage to non-smooth exterior surfaces and to construct signage elements with insert windows.

Exterior foam tape - acrylic-based adhesive

Exterior double-coated film tape

For applications where temperature extremes and environmental considerations are essential. Excellent bond to vinyls, dead-load acrylic adhesive coated on both sides of polyester films. Use to attach signage on smooth exterior surfaces and to assemble signage elements. This product is ideal for applying metal or plastic sheets to award plaques that will be placed in humid areas or areas that experience temperature changes.

Exterior film tape - acrylic-base adhesive

Description	Part no.
Acrylic film tape 3" x 36 yds.	36326
Acrylic film tape 2" x 36 yds.	36325
Acrylic film tape 1" x 36 yds.	36220
Acrylic film tape 1/2" x 36 yds.	36232
Acrylic film tape 6" x 18 yds.	36327
Acrylic film tape 12" x 18 yds.	36328

Tape composition

Interior double-coated foam tape

Cross-linked, closed cell polyethylene foam coated with high tack, high shear synthetic adhesive system. Good chemical and fuel resistance. Adhesive performance is excellent for mounting applications. Use to attach signage on rough interior surfaces and as spacer to assemble signage with insert windows.

Interior foam tape - rubber-base adhesive

Description	Part no.
1/32" x 1" x 72 yards - white	36240
1/32" x 1/2" x 72 yards - white	36241
1/32" x 1" x 72 yards - black	35783
1/32" x 1/2" x 72 yards - black	35784
1/16" x 1" x 36 yards - white	36242
1/32" x 1" x 18 yards - white	36216
1/32" x 1/2" x 18 yards - white	36217
1/32" x 1" x 18 yards - black	35780
1/16" x 1" x 18 yards - white	36218

Interior double-coated film tape

Film coated on both sides with an aggressive rubber-based pressure-sensitive adhesive system. Use to attach signage on smooth interior surfaces and to assemble signage elements. This product is ideal for applying metal or plastic sheets to award plaques.

Interior film tape - rubber-base adhesive

Description	Part no.
1/2" x 36 yards	36213
1" x 36 yards	36214
2" x 36 yards	36330
3" x 36 yards	36331
6" x 18 yards	36332

Interior paper tape

A 3.5 mm impregnated crepe paper coated on both sides with high quality synthetic adhesive system. For use in applications where tensile strength and additional thickness are needed for bonding and laminating or holding. Excellent for plate mounting. Economical adhesive tape for mounting metals and plastic plates to plaques and awards. Commonly used to stick sheets to the laser or engraving bed to reduce prevent material bowing or slippage during the engraving process.

Interior paper tape - rubber-base adhesive

Description	Part no.
1/2" x 36 yards	36210
3/4" x 36 yards	36211
1" x 36 yards	36212

Adhesive sheets

Lightweight paper stock coated on each side with aggressive rubber-based adhesive. Each adhesive layer is protected by a release-coated liner. Recommended for mounting on flat surfaces. Ideal for applying adhesive backing to engraving sheet stock.

Description	Part no.
Package of 10 12" x 12 1/2" sheets	36219

ENGRAVING SUPPLIES

Adhesives

Gravo-Bond

Bonds plastic or metal to any surface. Use just a drop and it sets in 10 seconds. Gravo-Bond is a non-solvent based adhesive.

Description	Part no.
Gravo-Bond adhesive – 1 oz.	36230

New Hermes cement*

For bonding plastics or metal to any surface. Brown cement is specially formulated to use with phenolic.

Description	Part no.
Clear cement - 1 pint can	48700
Brown cement - 1 oz. tube	47989
Bond acrylic - 1 pint can	36236

Oxidizing agents

Aloxide and Gravoxide*

Aloxide and Gravoxide induce a chemical reaction to blacken engraved areas for a contrasting effect. Apply to engraved area and wipe surface clean. 3 oz. bottle.

Description	Part no.
Aloxide 12pk	32799
Anodized aluminum	32800
Gravoxide 12pk	32820
Gravoxide for brass*	32821
Swab applicator	32822

Edges of brass should not be exposed to Gravoxide. Not for use on gold-plated, hand-polished and/or lacquered items.

Paint/Color fills

Engravocolor sticks

For brushless color filling of plastics and base metals. When ordering Engravocolor sticks separately, specify part number and quantity for each color. Sticks are .8 oz.

Color	Part no.
White	32824
Red	32827
Black	32828
Green	32829
Blue	32830
Yellow	32831
12 assorted (4 black, 4 white, 1 each of other colors)	32823

Laser colored foils

- Solid color 2 mm thick mylar tape for laser engraving
- Adds color and richness to your laser engraved pieces
- Permanent acrylic adhesive great for woods

Description	Part no.
Black 6" x 25" Roll	45887
Blue 6" x 25" Roll	45888
Green 6" x 25" Roll	45894
Red 6" x 25" Roll	45955
Bright gold 6" x 25" Roll	46119
Brushed gold 6" x 25" Roll	46120
Silver 6" x 25" Roll	46123

Engravers Enamel*

For filling engraving in metal and plastic. Not recommended for use on Metallex. 1/2 pint cans.

Color	Part no.	Color	Part no.
White	32808	Blue	32814
Black	32812	Yellow	32815
Gold	32809	Gray	32817
Red	32811	Almond	32816
Green	32813	Orange	32810

Rub N Buff

For rich looking fills on non-porous surfaces. Excellent engraving color fill for glass. Just dab on, rub in, and buff off excess.

Color	Part no.
Grecian gold	51675
Silver	51672
Spanish copper	51676
Black	51677
White	51678

*These items are shipped via ground transportation only.

Paint fill tool

For surface and subsurface paint fill applications. Engraved graphics and letters are color-filled with one pass. A must have tool for paint filling engraved work.

Part no.	36226
----------	--------------

Deluxe Paint fill pen

Tool for use in engraving & paint filling. No outside source/compressed air needed. Comes with 4 different easy-to-change tip sizes. A must for engravers who color fill.

51674

LASER MARKING SUPPLIES

Spray thin coat & let dry

Bond with a CO₂ laser

Wash to reveal mark

All products work with most uncoated metals. Excellent for metal marking with a CO₂ laser.
Read instructions carefully before use.

TherMark laser marking tape

For efficient dry permanent marking

TherMark tape is an ideal product for expanding the range of materials that can be marked with a CO₂ laser engraver. Available in a 50ft roll in 3 standard widths (1", 2" & 3" wide), it can be used to create high contrast, permanent black marks on bare, plated and anodized metals. Cut the tape to the size of the mark, then simply apply by hand and engrave with a 30W and above laser. The excess tape is then peeled off to reveal the final mark. This product is suitable for outdoor use.

Description	Part no.
TherMark laserable tape 1" wide	48315
TherMark laserable tape 2" wide	46255
TherMark laserable tape 3" wide	48314

TherMark laser marking spray and pastes

Water-based for fast clean up

TherMark liquid pastes allow most metals to be quickly marked using a CO₂ laser engraver. A thin coat of material can be painted or sprayed onto the metal, then left to dry for less than 2 minutes. Engrave with your laser of 25W or greater to produce high contrast, permanent black marks. The excess water-based materials can be easily washed off to reveal the final mark.

Description	Part no.
TherMark LMM14 6 oz aerosol spray	47821*
TherMark LMM14 50g liquid paste	47822
TherMark LMM14 250g liquid paste	47823

CerMark laser marking spray and pastes

Solvent-based for easy handling before marking

CerMark metal marking pastes also allow most metals to be marked using a CO₂ laser engraver. Similar to TherMark liquids, the CerMark products contain a hardener that allows the products to be easily handled prior to marking with your laser. The final result is the same permanent black marks on a range of bare metals. Good for CO₂ lasers, 25W and above.

Description	Part no.
CerMark LMM6000 12 oz aerosol spray	31086*
CerMark LMM6000 50g liquid paste	45694*
CerMark LMM6000 250g liquid paste	31085*
CerMark LMM6000 500g liquid paste	50808*

New accounts are the lifeline of any business. Branching out into new markets is one way to grow your business and maximize your engraving capabilities. Our sales kits will get you started without extensive product selection and inventory commitments. Here's how it works. Choose the sales kit of your choice. You save at least 25% off the regular individual selling price.

Includes all imprintable and New Hermes literature.

Engraved signs displayed on Velcro boards. Features our most popular materials and frame sizes. In a sturdy leather-look portfolio.

A black carrying case, likely for a portable electronic device, is shown open. Inside the case, several business cards and a small notebook are visible. The cards include contact information for various individuals and organizations, such as '320', 'CONFERENCE ROOM', '307', 'STEVEN W. KIM', 'Marshall Callahan', 'Office Hours', 'East Side Jewish Center', and '1244 ADMINISTRATION'. The case has a handle on the right side.

Engraved multi-column, standard and multi-directories, plus wallplates. Kit also includes two Velcro® boards for display.

Seven most popular sizes in black, gray and brown. Total of 21 round and square corner frames combined. Includes wall mount, snap locks and suction cups.

Includes standard silver directory, one each of gold and silver mini-directory, deskbar, wallplate and deskplate.

Actual sample chips show the surface and letter colors of all Gravograph materials. Each material is segregated by product line.

Description
A variety of frames and sizes

Pre-cut strips and plates of GravoTac 1/16" profiling material in black and white, equal to 8 full sheets. Plus, 38 black square corner modular frames in the most popular sizes.

A collection of various color calibration charts and tools. The central element is a large fan of grayscale and color patches. To the left, there are several smaller charts, including a color checker chart and a ruler. To the right, there are more charts, including a color checker chart and a ruler. The charts are used for ensuring color accuracy in digital imaging and printing.

Pre-cut strips and plates of GravoTac 1/16" backplate and 1/32" profiling material in black, red and yellow, equal to 10 full sheets.

FONT TYPES ARE CRITICAL TO ENGRAVING QUALITY AND TIME

There are 2 main types of fonts for engraving: TrueType (print fonts), and pre-engineered engraving fonts.

TrueType fonts are outline fonts. They can be filled for a solid, bold look. Filling requires the engraving program to calculate the tool paths.

Engraving fonts are pre-engineered fonts with optimized tool paths designed for reducing engraving time and optimizing engraving quality. Engraving fonts are optimized with reduced tool lifts and tool paths starting from the inside of a contour - so you don't lose the leading edge of a filled contour which causes "dimpling". Direction of tool path is predetermined for high quality engraving. The engraving path order is optimized as a time saving measure. Use single-line fonts to increase production speed.

When selecting cutters, please use the B chart on page 87 as a guideline for choosing the appropriate sized tip for engraving.

1/4" Diamond Drag cutters for metal

Cutting width Part no.
.020 34261

1/4" Burnishing cutters for coated and polished metals.

Trophy Brass, Colored and Marbled Steel, Gravoxal, and Gravometal

Maximum depth .002
(use light pressure setting for best results)

.125	34305
.250	34306

1/4" Parallel cutters for 90° cut outs

Material Type	Part no.
Gravoply	34023
Phenolic	33999
Ferrous metals	34010

Please see page 92
"How To Choose
Parallel Cutters"

FOR ADA CUTTERS, SEE PAGE 45

1/4" Radius cutters for rounded cut

Use reverse engraving on Gravoglas for neon tube look. Also used for gasket grooves & 3D milling

Material type	Part no.
Gravoply	34023
Phenolic	33999
Ferrous metals	34010

Please see
"How To Choose
Parallel Cutters"
to the right

HOW TO CHOOSE PARALLEL CUTTERS

Typical applications – Typical applications for Parallel cutters include cutting holes and routing flexible engraving plastic.

Type of cut – The main difference between Parallel cutters and standard engraving cutters is that the cut is vertical rather than beveled.

How to order

- 1) Choose the cutter family by the material you are engraving or cutting from the charts on these pages. For soft plastic, choose either Carbide or High Speed Steel (HSS). Carbide lasts longer but costs more than High Speed Steel (HSS). For metal, carbide is recommended.
- 2) Specify the tip diameter size.
 - Tip sizes can be specified from .015" to the shank diameter.
- 3) Specify the cutting depth.
 - For best strength, specify tip length up to 1.5 times the tip diameter.
 - Tip lengths > 1.5 x tip size can be specified, but they will tend to break easier.
- 4) Call Customer Service at 1-800-843-7637 to place an order.

Parallel cutters vs. engraving cutters where tip size equals shank diameter – Standard conical cutters with tip size equal to shank size will also provide a vertical cut. The difference is that the cutting depth is fixed with engraving cutters, but can be specified with Parallel cutters.

Typically, the cutting depth of engraving cutters with tip size equal to shank diameter is in the range of .125" - .150". These are primarily for engraving applications, but can also be used for routing.

Application tips – Cutting or routing 1/8" acrylic is best performed with a 90 x 150 Parallel cutter (.090" tip and .150 length). The Carbide tool is part number 34118, and the HSS tool is part number 34085. Cutting in one pass can be accomplished with the 200 watt spindle motor. Cut in multiple passes when using the 80 watt spindle motor.

Cutting or routing 1/4" acrylic is best performed with a 171 x 275 Parallel cutter (.171" tip and .275 length). The Carbide tool is part number 34118 and the HSS tool is part number 34085. This should be cut in multiple passes.

Radius cutters – Radius cutters are similar to Parallel cutters except for having a rounded shape. These are specified the same. Available in HSS or Carbide for tip sizes at least .030". Applications include reverse engraving, 3D contouring & gasket grooves.

SPECIALTY CUTTERS AND ACCESSORIES

Gravoglyde attachment

Add the Gravoglyde attachment to your cutter to get a light pressure or soft touch for a great polished look for burnishing (not for M series machines).

For 1/8" cutters	34379
For 11/64" cutters	34384

Yellow handle cutter wrench

To tighten and loosen set-screws in brass collar of 1/8", 11/64", and 1/4" cutters.

33015

Black handle cutter wrench

To tighten and loosen set-screws in brass collar of M20 and M40 machine spindles (for cutter replacement).

10016

Wrench for diamond inserts

To tighten and loosen set screws holding diamond inserts.

33009

Ball Point Pen cutter

Used to verify engraving location on tape prior to engraving to prevent costly mistakes.

1/8" Ball Point Pen cutter for IM4 and M20 machines	47112
Ball point pen assy. (11/64" shaft) M40 only	21679
Ball point pen assy. (11/64" shaft) IS Series only	33568
Ball point pen cartridge replacement (medium) 2 per pack	33569
Paper and card holder - 8" to "pen-out" jobs	33571

Diamond inserts

5/16" length, 1/8" shank for manual Inside ring engraver and IM4RM	28187
7/16" length, 1/8" shank for M20 Pix and M20 Fixed Diamond	33825
Heavy duty diamond spindle with insert, non-rotating	22224
1" replacement insert for 22224	33827

.015 Modified Faceted cutter for glass engraving

Use with nose cone 32777

Description	Part no.
11/64 Modified Faceted cutter 015 6" Long	49720

Cutters for collet spindles / All 2" length unless specified

Beveling cutter

45° angle for matrix beveling cutouts on computerized machine. 0" tips size

Description	Part no.
1/8 diameter	33960
11/64 diameter	34048

Beveling Combo cutter

Cut out and bevel in one operation. Bevel at 45deg for 1/3 to 1/2 of depth and parallel edges to full depth. Applications include badges and irregular shaped items difficult to do with beveling machine.

Description	Part no.
11/64 for 1/16 material, 060 tip, 032"	65247
11/64 for 1/8 material, 060 tip, 062"	65248
1/4 for 1/8 material, 060 tip, 062"	65249
1/4 for 1/16 material, 060 tip, 032"	65250

Custom cutter sizes are available upon request

ONECUT Cutter Sharpening Service

Resharpen	Part number
Carbide tip	36671
Parallel cutter	36672
End mill	36669
Diamond cutter	36667
Diamond glass cutter	36666

Note:

Diamond cutters missing diamond tips can't be resharpened. Saw blades, shear blades and corner shaper cutters resharpening service available Please send cutters to:

Gravograph Cutter Sharpening Service
2144 Bridge Avenue • Point Pleasant, NJ 08742

ZEROING YOUR CUTTER AND SPINDLE

Before You Begin

This document explains how to reset your cutter and depth nose for engraving plastic and metal material. Properly setting the cutter will provide a consistent engraving depth throughout the material and give your chip collection system increased ability to remove debris from the engraving area. Properly setting your cutter can reduce the risk of breaking the cutter tip by not allowing it to drill too deep.

Q: When should I reset my cutter?

A: You should reset the cutter when the cutter is being changed or if you experience inconsistent or incorrect depth.

This procedure can be performed on any Gravograph rotary engraver using any conical (V-shaped) tip, diamond cutter or burnisher.

You will need: Cutter, 2mm Allen driver or cutter wrench spline (depending which machine you own).

Step-By-Step Instructions (Plastic)

Note: Steps 1-6 are for using V-shaped cutters used for engraving plastic or wood.

1. If you own a GTM-series machine, use the 2mm Allen key to loosen set screw and remove cutter. If you own an IS-series or Vanguard-series engraver, use cutter wrench spline to loosen set screw on gold cutter button to remove cutter.

2. Screw micrometer all the way up then unscrew three full turns to the nearest zero. (See picture in step 3)
3. Use arrow buttons on machine to move spindle over material. Press **Z then down** to lower nose cone to the material until it touches.

4. Insert cutter through the top of the spindle and gently lower it all the way until you feel it touch the bottom. Tighten set screw to secure cutter.
5. Press **Check**.
6. Use micrometer to dial in desired depth, thus exposing the tip.

Step-By-Step Instructions (Metal)

Note: Steps 7-10 are for using diamond cutters or burnishers for engraving on metal.

7. If you own a GTM-series machine, use the 2mm Allen key to loosen set screw and remove cutter. If you own an IS-series or Vanguard-series engraver, use cutter wrench spline to loosen set screw on gold cutter button to remove cutter.
8. Screw micrometer all the way up then unscrew three full turns to the nearest zero.
9. Insert cutter through the top of the spindle and gently lower it until the cutter protrudes from the nose cone approximately 1/4 inch.

Note: If getting inconsistent engraving, check that the cutter is held tightly. Also check if tip is dull and needs to be changed.

JIGS AND HOLDING DEVICES

**All jigs with 5 mm vise pins can be used with IS and M series machines*

JIGS

NAMEPLATE JIG with stop (6" long)
32936 - for machines with 3/16" vise pins
32937 - for all IS* machines, or machines with 5 mm vise pins

FLAT PLATE JIG (5.5" long)
31367 - for machines with 3/16" vise pins
31368 - for all IS* machines, or machines with 5 mm vise pins

ALUMINUM JIG (9.5" long)
Holds name plates, or flat items.
22872 - For use with machines* with 5 mm vise pins

JEWELRY NAME PLATE JIG
32922 - for machines with 3/16" vise pins
32923 - for all IS* machines, or machines with 5 mm vise pins

WATCH JIG
32926 - for machines with 3/16" vise pins
32927 - for all IS* machines, or machines with 5 mm vise pins

ID BRACELET JIG
Part no. 28192 for all M series and IS series machines

SIGNET RING JIG
32908 - for machines with 3/16" vise pins
32909 - for all IS* machines, or machines with 5 mm vise pins

CHARM AND BANGLE BRACELET JIG
32892 - for use with machines* with 3/16" or 5mm vise pins

JEWELRY VISE
Holds small jewelry items.
22870 - For use with machines* with 5 mm vise pins

IRREGULAR SHAPE
Holds irregular shaped items - comes with 6 pins.
32887 - for use with machines* with 3/16" or 5mm vise pins.
33089 - 6 extra pins

MULTI-PURPOSE JIG
Holds items of many shapes and sizes. Sliding pins conform to the shape of the object to be held.
20193 - for machines with 3/16" vise pins
30628 - for all IS* machines, or machines with 5 mm vise pins

RUBBER PEN JIGS
32882 - Jigs will not scratch parts. These are compliant yet firm enough to securely hold irregularly shaped objects

PEN AND TUBULAR OBJECT JIG
32881 - for use with machines with 3/16" or 5mm vise pins

GRAVOFOIL JIG
For use with thin material like Gravofoil.
22868 - For use with all engraving machines that have a vise

DEPTH ADJUSTABLE JIG
65414

PLAQUE JIG
32893 - for use with machines with 3/16" vise pins
32931 - for all IS* machines, or machines with 5 mm vise pins

CELL PHONE JIG
49510 - specially designed to hold cell phones and electronic devices such as ipods, PSP games, etc.
For all M series and IS machines, or machines with 5 mm vise pins

BANGLE BRACELET JIG
51729 - for outside engraving of bangle bracelets; Works in 90° engraving mode.
For all M series and IS machines, or machines with 5 mm vise pins

Call for details on specialty jigs not pictured.

Gravograph provides an extremely wide selection of jigs, developed for and with customers.

ENGRAVING NOSE CONES

FOR REGULATING ENGRAVING DEPTH

Depth noses are essential in ensuring perfect and constant engraving depth. We offer a wide variety of noses which are compatible with all our machines.

.040 Steel nose cone for 1/8" cutters. Uses up to .020 cutter widths
Part no. 20130

.060 Steel nose cone for 11/64" cutters. Uses up to .040 cutter widths
Part no. 20131

.092 Steel nose cone for 11/64" cutters. Uses up to .060 cutter widths
Part no. 20486

.185 Steel nose cone for 11/64" cutters. Uses up to .171 cutter widths
Part no. 12215

.093 Steel nose cone for 1/4" cutters. Uses up to .060 cutter widths
Part no. 20936

Wide nose for filling larger text/logos - to maintain contact with the surface of the material to prevent "dimples or low spots" 16 mm .63 opening
Part no. 20960

.250 Steel nose cone for 1/4" cutters. Uses up to .187 cutter widths
Part no. 20491

5mm Steel Swivel nose cone for 11/64" cutters. For glass engraving and to control depth on uneven or curved surfaces
Part no. 20459

3.5mm Teflon Swivel nose cone for 11/64" cutters. For glass engraving and to control depth on uneven or curved surfaces - prevents scratches.
Part no. 22481

Prismatic Swiveling Steel nose cone for 11/64" cutters. Used for curved jewelry-bracelets such as ID or bangle bracelets
Part no. 22885

8mm Delrin nose cone for 11/64" cutters. Prevents scratches on easily scratched surfaces
Part no. 31373

Fixed Diamond nose cone 11/64". Provides better rigidity & accuracy than a non-rotating diamond cutter. Also good for picture engraving and jewelry
Part no. 22884

3.3mm nose cone and nozzle assembly for collet spindle chip collector - Part no. 32351
3.3mm nose cone only for 11/64" or collet spindle chip collector - Part no. 21665

1.5mm nose cone and nozzle assembly for collet spindle chip collector - Part no. 32353
1.5mm nose cone only for 11/64" or collet spindle chip collector - Part no. 21666

Standard nose cone for 11/64" chip collector - Part no. 21667

8mm nose cone and nozzle assembly for 11/64" cutters using chip collector Uses up to .171 cutter widths - Part no. 31372

2" Delrin nose cones for 11/64 spindle - Part no. 31377
2" Delrin nose cones for collet spindle - Part no. 31376
Used for plastic cut outs to handle high chip loads

SHEARS AND SAWS

**Shear cutting
thickness specs:**

	Metal	Plastic	Combo
Flexible plastics		1/16"	1/16"
Trophy brass	0.025"		0.020"
Aluminum	0.050"		0.030"
Steel	0.025"		0.015"

Combination metal, and plastic shear

- The lower blade is easy to set and replace.
- The handle offers leverage for easier cutting.
- There is no flex on the upper blade.
- Three scale selections optimize the settings of blades.
- There is no need to adjust the upper blade.
- Improved angles on the upper blades result in smoother cutting.
- Parts are easy to replace because the shear is modular in design.

Combo shear part number - 31711

Metal shear part number - 20199

Plastic shear part number - 20198

Replacement Blades

Upper Blade			Lower Blade
Metal	Plastic	Combo	All
Current model (shown above) - black table & silver handle			
31723	31732	31716	31733
European model - white table & black handle			
20201	10205	n/a	10204
Original model - gray or orange			
31714	31729	n/a	31730

Shear Blade Sharpening Service

Lower shear blade (metal, plastic or combo)	36683
Upper plastic shear blade	36685
Upper metal shear blade	36684
Upper combo shear blade	36682

VA-10 safety saw

- Maximum cutting thickness for plastics up to .250" thick.
- Maximum cutting thickness for non-ferrous metals (brass and aluminum) up to .157" thick.
- Safely cuts plastics and metals up to 24.5" wide.
- Accurate cutting ensured by a movable stop with automatic return and ruler.
- Integrated chip collector.
- Lubrication system, saw comes standard with .5 liter (16.9 oz) bottle of Vargol lubricant.
- Saw blade: 24 Tungsten Carbide.
- Motor: 350 watt, 60hz, 110 volt, 15,000 RPM.
- Dimensions: 32.7" x 21.7" x 9.8".

Part number - 21771

Replacement motor - 24205

Replacement blade, 24 teeth: 21773

Optional blade, 36 teeth: 21796

Vargol lubricant, 16.9 oz. bottle: 21780

Replacement on/off switch: 21784

Fuse - 10 amp pack of 5: 49898

VA21-15 safety saw

- Maximum cutting thickness for plastics up to .2725" thick.
- Maximum cutting thickness for non-ferrous metals (brass and aluminum) up to 0.197" thick.
- Safely cuts plastics and metals up to 40.55" wide.
- Integrated chip collector.
- Lubrication system, saw comes standard with .5 liter (16.9 oz) bottle of Vargol lubricant.
- Saw blade: 36 Tungsten Carbide.
- Motor: 500 watt, 60 Hz, 110 volt, 13,000-15,000 RPM.
- Dual stop on right hand side with spring-operated return and graduated ruler.
- Side stop on left hand side with adjustment and material support.
- Dimensions: 50.4" x 21.7" x 9.8".

Part number - 21769

Replacement blade, 36 teeth: 21796

BEVELING AND GRINDING MACHINES

B4

- Simple beveling for plastic materials up to .125" thick.
- 3 types of beveling - 30 degree, 45 degree and 90 degree.
- 2 different types of tools - 1/8" diameter (steel and Tungsten Carbide) according to the materials to bevel.
- Order cutters separately, based on your application.
- Dimensions: 12.2" x 6.3" x 4.7"
- Weight: 15 lbs.

Part number - 32274

1/8" cutters for B-4 Beveler:

- For 30 degree angle - **33956**
- For 45 degree angle - **33958**
- For 90 degree angle - **33967**
- For full width - **33960**

B6

- For easy beveling on plastic and metal materials up to .250".
- Order cutters separately based on your application.
- Includes device to cut rounded corners with 3 different radii (.02", .04", .06").
- Comes with an integrated chip extractor.
- Dual micrometers control depth, angle of beveling and corner rounding
- Dimensions: 19.7" x 13.4" x 11.8"
- Weight: 16 lbs

Part Number - 32190

1/4" Cutters for B-6 Beveler:

- For 30 degree angle - **34322**
- For 45 degree angle - **34323**
- For 90 degree angle - **34324**

Rounding jig kit

24661 - B6 rounding jig kit for .2", .4" and .6"

CG-30 CUTTER GRINDER

- Reliability and quality. The CG 30 grinding machine benefits from Gravograph's high standards of manufacturing and knowledge.
- Compact, CG 30 requires minimal workspace.
- Easy to use. CG 30 enables the grinding of all cutters except diamond tip cutters.
- The cutter is automatically positioned, thanks to the guiding tool.
- The principal cutting angles are selected, thanks to the graduated index.
- A preset index automatically indicates the cutter position for the realization of the truncature, without disassembling the cutter holder.
- Absolute safety. CG 30 protection guard ensures optimum protection.
- Clean. The incorporated dust extractor allows collection of the dust particles.
- A series of collets for the grinding of cutter (1/8", 11/64", 3/64", 1/4", 5/16").

Part Number - 34490 - CG-30 Cutter Grinder (includes 1 collet-specify from list below, 1 carborundum grinding wheel, 1 11/64" diamond dresser).

Grinder Collets

20890 - 1/8"
20891 - 11/64"
20892 - 1/4"
27836 - 5/16"

Grinding Wheels

32760 - 2 1/4" diamond for sharpening all cutter types

Dresser Stick

32766 - 1/4" dressing stick for resin bound diamond wheel. Used for smoothing diamond wheel.

MANUAL MACHINES

GTX-L/ITX-L Pantograph floor model engraving machines

A sturdy floor model designed to accommodate odd shape, cylindrical and flat items. Ideal for objects such as bowls, cups, trays, trophy plates, awards, control panels and signage. Holds plates up to 14.75" high by any length and up to 8" thick. Holds cylindrical objects up to 8" in diameter with optional adapter.

Specifications

- 25 engraving ratios from 2:1 to 7:1
- 3.5" x 12" engraving area at 2:1 ratio
- 6" x 16" graduated copy slide table for holding multiple copy slides for multi-line engraving
- Order 11/64" diameter cutters to fit IM-3 rotating spindle
- Auto indexing system
- 4 work holding cones up to 6" diameter
- Machine stand included
- Dimensions: 30" x 22" (762 mm x 559 mm)
- Approximate weight: 100 lbs

Model Non-rotating spindle **GTX-L** **31122**
Model Rotating spindle **ITX-L** **31124**

RV-II Inside Ring Engraver Part No. 34637

- Engraves inside of rings
- Automatically centers ring in clamping jigs
- Easy to use, synchronized, one step engraving and spacing
- Diamond insert for hand engraving effect

Tracing stylus **21190**
 Holding jigs (1 each) **12500**
 Diamond insert for RV-II **33825**

Copy dials for inside ring engraver

(Includes numbers and letters)

Extended gothic and tilted block **49138**
 (Standard with RV-II)

Extra condensed block **49139**
 For 2-line engraving **47586**
 Connecting script dial **24766**

GM-3/IM-3/GF-3/IF-3 Pantograph engraving machines

A lightweight and compact engraving machine ideal for businesses with limited space. Its automatic centering capabilities make it simple to operate. Ideal for small objects such as nameplates, badges, ID plates, and small jewelry items.

GM-3/IM-3: Holds plates up to 5.5" high by any length

GF-3/IF-3: Holds plates up to 3.5" high by any length

Specifications

- 25 engraving ratios from 2:1 to 7:1
- 4.5" x 9 7/8" engraving area at 2:1 ratio
- 6" x 16" graduated copy slide table for holding multiple copy slides for multi-line engraving
- Order 1/8" diameter cutters to fit IM-3 rotating spindle
- Approximate Dimensions:
 GM-3/IM-3 - 16" x 22" x 15" (406 mm x 558 mm x 381 mm)
 GF-3/IF-3 - 18" x 22" x 15" (457 mm x 558 mm x 381 mm)
- Approximate weight: 25 lbs

Model Non-rotating spindle **GM-3** **30640**
Model Rotating spindle **IM-3** **30644**
Model Non-rotating spindle **GF-3** **31229**
Model Rotating spindle **IF-3** **31230**

Computerized Ring Engraver

Part No. 30750

The IM4RM is designed for efficient engraving on the inside of rings.

Capable of engraving multiple lines of text and logos, and handles ring diameters from .5" to .95" (13 mm to 24 mm)

Replacement diamond insert **28187**

ROTARY MACHINES

ENGRAVE ANYTHING FROM PLASTIC TO STAINLESS STEEL

M20 DIAMOND

Designed for engraving on flat objects such as trophy plates, luggage tags, small gifts, badges, leather gifts, pet tags and jewelry.

M20 3 AXIS

Designed for engraving on flat objects such as trophy plates, luggage tags, small gifts, badges, leather gifts, pet tags and jewelry.

M20 4 AXIS

Quickly change over from engraving on flat objects to engraving on cylindrical objects. Designed for engraving pens, small gifts, flat, round and cylindrical objects, as well as jewelry.

M20 JEWEL

The all-in-one jewelry engraving solution designed for engraving flat objects like watches, bracelets, necklaces and small gifts. **Efficiently engraves the inside and outside of rings.**

Upgrade with QuickPix software for the ability to engrave photos.

M20 PIX

The photo engraver ideal for metallic gift items such as lighters, key chains and gift boxes.

Designed for metallic medals, pendants and jewelry items. Specially designed for picture and text engraving on gold, silver, copper, platinum, stainless steel, etc.

All M20 series machines

- Completely self-contained in a 12" x 13" x 12" unit — aesthetic, quiet & portable, weighing under 25 lbs.
- Everything you need — engraving machine, software, fonts, tools, accessories and tutorial.
- Self-centering vise — for easy clamping and positioning of objects.
- Depth nose — allowing for consistent engraving, even on uneven surfaces.
- Integrated red spotting beam-setup and simulate your job before you engrave for error-free engraving with no measuring required.
- Integrated auto-Z — easy cutter setup.

Specifications

- Size: 12.2" x 13.4" x 12.2" (310 mm x 340 mm x 310 mm)
- Weight: approx. 18 lbs. (8 kg)
- Engraving area: 3.9" x 3.9" (100 mm x 100 mm)
 - In XL mode (no red spot beam – 4.9" x 3.9" (124 mm x 100 mm)
- Z stroke: 1.18" (30 mm)
- Brushless motor spindle
 - 1/8-in. (3.2 mm) hollow shaft
 - 19,200 rpm
 - 20W DC
 - Adjustable spindle pressure
- Tooling: 1/8" (3.17 mm)
- Self centering vise max. opening capacity: 4.7" (119 mm)

ROTARY MACHINES

ENGRAVE ANYTHING FROM PLASTIC TO STAINLESS STEEL

M40 DEEP VICE

Economically engineered with a 12" x 8.2" engraving area. Includes red laser pointer for easy no measuring set-up and engraving verification.

Engraving area: 12" x 8.2" (305 mm x 210 mm)
 Maximum holding capacity:
 Vice: unlimited x 9.2" x 1.96" (234 mm x 50 mm)
 Table: 13" x 10.2" x 1.4" (330 mm x 260 mm x 36 mm)
 Machine dimensions: 22" W x 23.6" L x 12.6" H
 (550 mm x 600 mm x 320 mm)
 Machine weight: 42 lb (19 kg)
 Max spindle travel: 1.6" (40 mm)
 Spindle rotation speed: 20,000 rpm fixed
 Tool diameter: 11/64" (4.36 mm)
 Spindle motor: 50W DC

M40 with OPTIONAL AUTO PLATE FEEDER

Machine: M40 or IS400
Auto Plate Feeder 48326

Auto Plate Feeder – Designed as an overhead saver. Produce large run plates unmanned. Just load the magazine with plates, and take care of other business while the Auto Plate Feeder automatically feeds a new plate after each engraved job. Each plate can have unique information by utilizing the variable list and matrix functions in GravoStyle™ software.

M40ABC

AS EASY AS 1,2,3

- Ideal for industrial tags, name badges and signs.
- Travelcase and full line of supplies for onsite marking.
- No PC needed comes with super simple software no technical background needed to operate.

Engraving area: 12" x 8.2" (305 mm x 210 mm)
 Maximum holding capacity:
 Table: 13" x 10.2" x 1.4" (330 mm x 260 mm x 36 mm)
 Machine dimensions: 22" W x 23.6" L x 12.6" H
 (550 mm x 600 mm x 320 mm)
 Machine weight: 42 lb (19 kg)
 Max spindle travel: 1.6" (40 mm)
 Spindle rotation speed: 20,000 rpm fixed
 Tool diameter: 11/64" (4.36 mm)
 Spindle motor: 50W DC

M40G

Versatile machine for quick change from flat to cylindrical work. 12" x 8.2" engraving area. Handles up to 6.7" diameters. Comes complete with coolant recirculation system, to prolong cutter life when engraving glass. Includes red laser pointer for easy no measuring set-up and engraving verification.

Engraving area: 12" x 8.2" (305 mm x 210 mm)
 Maximum holding capacity:
 Motorized vise: 17.7" x 9.4" x 7.5"
 (450 mm x 234 mm x 50 mm)
 Cylindrical diameter: min. .16" (4 mm) max. 6.7"
 (170 mm)
 Maximum tilt: +/- 10°
 Machine dimensions: 29.5" W x 21" L x 22" H
 (750 mm x 540 mm x 570 mm)
 Machine weight: 77 lb (35 kg)
 Max spindle travel: 1.6 in. (40 mm)
 Spindle rotation speed: 20,000 rpm fixed
 Tool diameter: 11/64 in. (4.36 mm)
 Spindle motor: 50W DC

ROTARY MACHINES

ENGRAVE ANYTHING FROM PLASTIC TO STAINLESS STEEL

IS200 / IS200TX

3" x 9" engraving area. Optional TX base available for engraving cylindrical and large objects.

Engraving area: 8.9" x 3.1" (225 mm x 80 mm)
Maximum holding capacity:
Machine dimensions: 19.7" W x 17" L x 11.6" H
(500 mm x 455 mm x 295 mm)
Machine weight: 44 lb (20 kg)
Max spindle travel: 0.6" (15 mm)
Spindle rotation speed: 17,000 rpm fixed
Tool diameter: 11/64" (4.36 mm)
Spindle motor: 20W DC

IS400

Industrial strength engraving machine designed to tackle your most difficult engraving applications. 8" x 12" engraving area.

Engraving area: 12" x 8.2" (305 mm x 210 mm)
Maximum holding capacity
Vise: unlimited 9" x 15" (229 mm x 381 mm)
Table: 13" x 10.2" x 1.4" (330 mm x 260 mm x 36 mm)
Machine dimensions: 17.1" W x 24" L x 35.3" H
(550 mm x 609 mm x 894 mm)
Machine weight: 93 lb (19 kg)
Max spindle travel: 1.6" (40 mm)
Spindle rotation speed: 20,000 rpm variable
Tool diameter: 11/64" (4.36 mm)
Collet Spindle motor: 70W DC
Optional Collet Spindle
Optional Collets: 1/8" (3.17 mm), 11/64" (4.36 mm)
1/4" (6.35 mm)

IS400 VOLUME

Most versatile machine in range. Cylindrical and flat. 8" x 12" engraving area. 13.8" maximum diameter for cylindrical objects. Vise holds objects up to 15" thick. Includes red laser pointer for easy no measuring set-up and engraving verification.

Engraving area: 12" x 8.2" (305 mm x 210 mm)
Maximum holding capacity
Vise: unlimited 9" x 15" (229 mm x 381 mm)
Table: 13" x 10.2" x 1.4" (330 mm x 260 mm x 36 mm)
Cylindrical: Min: .8" (20 mm) Max: 13.8" (350 mm)
Max. object weight: 44lbs (20kg)
Machine dimensions: 35.4" W x 24.2" L x 33 in. H
(900 mm x 615 mm x 840 mm)
Machine weight: 198 lb (90 kg)
Max spindle travel: 1.6" (40 mm)
Spindle rotation speed: 20,000 rpm variable
Tool diameter: 11/64" (4.36 mm)
Optional Collet Spindle
Optional Collets: 1/8" (3.17 mm), 11/64" (4.36 mm)
1/4" (6.35 mm)
Spindle motor: 70W DC

Laureline

JEWELRY CUTOUT ENGRAVING TIPS

Machine: IS400 or IS400 Volume
Accessories needed:

- 47477 **Integrated 150W high frequency spindle** (60,000RPM) includes frequency converter, spindle, floating nose kit and 1/8" standard collet.
- 52180 **1/8" Carbide Stencil cutter** 2" shaft
- 32819 **Engravolume**
- 23520 **IS400 T-Slot table**
- 36213 **Double-sided film tape**
- GravoStyle™ **Discovery to Graphic upgrade**

When cutting 1 mm thick silver, you can cut through in 1 pass. With a Z down feed rate of .015 ips using a dwell of .2 ips, allowing the cutter to pierce the material before moving on the X,Y axis. The X,Y feed rate will be .015 ips. Use Engravolume as a lubricant to extend cutter life, and to achieve the cleanest cut possible. When cutting thicker or harder materials, the feed rate will need to be reduced or multiple tool passes and depths can be added to achieve a clean cut. Film tape placed under the material reduces vibration near the end of the cutout. A collet spindle is required for milling applications. The collet spindle grips the cutter near its tip, reducing tool chatter and vibration.

ROTARY MACHINES

ENGRAVE ANYTHING FROM PLASTIC TO STAINLESS STEEL

IS7000

Engraving area:
24" x 32" (610 mm x 815 mm)
Machine dimensions:
43" W x 56" L x 29" H
(1,093 mm x 1,420 mm x 735 mm)
Machine weight: 485 lbs (220 kg)

IS8000

Engraving area:
24" x 48"
(610 mm x 1,220 mm)
Machine dimensions:
43" W x 72" L x 29" H
(1,093 mm x 1,825 mm x 735 mm)
Machine weight: 584 lbs (265 kg)

IS900

Features

- 90 Watt Spindle and 200 Watt Spindle

Engraving area: 25" x 17" (635 mm x 432 mm)
Machine dimensions: 39.8" W x 32.5" L x 23.7" H
(1,012 mm x 825 mm x 603 mm)
Machine weight: 198 lbs (90 kg)

NOTE: Numerous options available to meet the needs of professionals in the areas of engraving and cutting, vise, table, cylindrical, maximum object weight, maximum spindle rotation speed, tool diameter, optional spindle motor and optional categories. Suitable for legend plates, part identification, control panels, ADA signage and large signage. Accessories include a complete range of spindles, cylindrical attachments and chip collectors.

IS7000XP/8000XP

A fast, accurate and powerful large table engraving system offering reliability and quality for engraving and milling. Direct current X, Y and Z axis motors. Accessories include a range of spindles, clamping accessories and tools.

IS7000XP

Engraving area: 24" x 32" (610 mm x 815 mm)
Machine dimensions:
43" W x 56" L x 29" H (1,093 mm x 1,420 mm x 735 mm)
Machine weight: 507 lbs (230 kg)

IS8000XP

Engraving area: 24" x 48" (610 mm x 1,220 mm)
Machine dimensions:
43" W x 72" L x 29" H (1,093 mm x 1,825 mm x 735 mm)
Machine weight: 618 lbs (280 kg)

Includes

- 200W spindle motor
- Collet spindle
- GravoStyle™ Graphic level

IS7000XP/8000XP MILLING

The XP milling system is a versatile CNC engraving/milling solution capable of producing a wide range of products from signage to front panels to 3D metal stamps. Now, both speed and accuracy are attainable due to direct current servo motors, pre-loaded ball bearing lead screws, solid cast construction and a high frequency spindle. Both small and large parts can be machined quickly and efficiently with the GravoStyle™ professional CAD/CAM engraving software provided.

A moderately priced solution, the XP milling system is a productive complement to a machine shop as a light-duty milling machine for machining smaller parts. The operating cost is lower than a full-size CNC machine.

Options include lubrication system, various size collets, brass tool collars, cylindrical attachment, ADA Braille system, high performance chip collector, self-centering vises (standard & heavy duty).

Auto tool changer

IS7000 XP Milling	49289
IS8000 XP Milling	49290

XP milling machine package consists of:

- XP milling machine
- High freq spindle: 1KW, 60 KRPM with 1/8" collet
- 7-position automatic tool changer (ATC)
- Auto Z-ref
- Auto tool height offset sensor
- GravoStyle™ - Graphic Level full pack

Features

- Factory integrated components for reliable operation
- Full ATC support in GravoStyle™
- Air-driven pneumatic collet for automatic tool changing
- Powerful 1KW 60,000 rpm precision spindle sub-system

Applications

- 2D & 3D signs
- Front panels
- Metal dies & stamps
- ADA signs
- Legend plates

Technical specs

HFS speed	5,000 – 60,000
Pneumatic unit air pressure	6 bar (90 psi)
HFS controller voltage	220-240 VAC, 4 A max

LASER MACHINES

LS100 (power ranges from 35 watts - 40 watts)

Engraving area: 12" x 18" (305 mm x 457 mm)

Maximum holding capacity:

Table: 20" x 13" x 5.7" (506 mm x 330 mm x 145 mm)

GravoStyle™ / LaserStyle™ Software

PROFESSIONAL CAD/CAM ENGRAVING SOFTWARE FOR ROTARY AND LASER ENGRAVERS

GravoStyle™ is the first **multi-technology software** in the engraving industry – engineered specifically for engravers. The synergy between GravoStyle™ software and the machine enables you to realize your equipment's full engraving potential, whatever technology you use.

GravoStyle™ professional engraving software is designed with the **capabilities to evolve as your needs grow**: it can rise to the challenge of your most complex designs. With multiple levels and options to improve your engraving productivity, you pay only for the functionality you need, when you need it. Pick and choose from a range of options such as photo editing and 2.5D engraving, to enable you to deal with custom requests.

GravoStyle™ is also versatile – able to drive **rotary, YAG, Fiber, and CO2** laser engraving machines.. No matter what material you are engraving now or in the future, Gravograph has the solution to meet your needs. Just one software for four perfectly integrated technologies: Rotary, YAG, Fiber, and CO2 laser machines – no need for training on 3 different softwares.

Explorer, Discovery, Industry, Discovery Max and Graphic Levels

For use with all Gravograph engraving machines.

GravoStyle™ engraving software is designed with the professional engraver in mind. Comprehensive text, graphics and layout capabilities designed for efficient operations of both rotary and laser machines – the industry's first! Complete with **WYSIWIRE** –

What You See Is What You Really Engrave, Ensuring A Proper Cutter Selection Before Running A Job.

Features of GravoStyle™ Software

- Windows XP, Vista and Windows 7 operating systems
- Point-and-shoot: area, width, center, arc, curve, multi-rectangles
- Optimized for engraving productivity
- Proprietary, optimized engraving fonts
- Easier to use than general purpose software
- Manual and automatic composition modes
- Add graphics and logos to your jobs – powerful import and export all common file formats – DXF, EPS, BMP, GIF, HPGL, JPG, PNG, TIF, WMF.
- Copy and paste clipboard between Corel and GS (WMF, EMF – bitmap and vector)
- Compatible with most rotary and laser engravers currently manufactured by other companies
- CMX file compatibility with Corel

GravoStyle™ / LaserStyle™ Software

Visit us online for the latest GravoStyle™ / LaserStyle™ product offerings.

- Copy and paste between excel, word, and GravoStyle™
- Add graphics and logos to your job
 - Symbol library – predefined or your own – save vector, bitmap, dials/scales or filled with tool path
 - Powerful tools for object manipulation
 - Adding/editing
 - Combining
 - Distorting
 - Aligning
 - Duplicating
 - Measuring
 - Rotating and stretching
 - Inside/outside offsets
- Scanning, vectorizing and cleanup
 - Interfaces directly with your scanner
 - Versatile vectorization capabilities
 - Powerful, easy to use cleanup tools
 - Point and node editing
- Matrix, variable list of names (international management), serialization
- Grade 2 ADA Compliant Braille
 - Raster Braille (drill and beads)
 - Routed Braille
 - Braille automation
 - Hole diameter and depth
 - Spacing
 - Lower cases management
- Comprehensive text capabilities
 - Automatic composition mode
 - Extensive font selection (True Type & Gravograph Engineered Fonts)
 - Character and line sizing and spacing
 - Special text functions
 - Text in a box
 - Text on a line
 - Vertical text
 - Text on an arc
 - Spell check
 - Text in columns
 - Find and replace text / font / size
 - Predictive text input
 - Mirror text
- Filling Toolpath Generation & Visualization
 - Quick and easy with Toolpath by color
 - Simple & quick 2D filling
 - Colored areas define different toolpaths
 - Preview
 - WYSIWIRE – What you see is what you really engrave – preview final appearance
 - Full Function Tool Library
 - Advanced toolpath CAM module
- Special laser features
 - Laser color control manager
 - Pen and brush (hatching) for design effects
 - White color management
 - Lasering Dialog
 - Automatic plate size
 - Saved profiles
 - Multiplate jobs
 - Calibration to find the right lasering parameters easily
- Integrated Driver
 - Job parameters saved with job
 - Define width of stroked fonts
 - Dynamic focal adjust in multi-pass
- Rubber Stamp Wizard
 - Based on list of variables
 - Automatic nesting
 - Cutting in cutting for dating stamps
 - Saves time, material and money
- Photolase Wizard
 - From picture to realization
 - Minimize trial and error
 - Save time and money
 - Add value to items marking significant events
- Tangential Entry / exit for perfect cutting
- Lasering preview
- Inlay wizard for easy marquetry
- Cylinder attachment quick positioning by symmetrical axis
- Job Templates
 - Set up standard jobs for your shop
 - Maintains all job parameters
 - Add custom notes
- Part Nesting
 - Optimizes usage of cut out material
 - Reduces wasted material and saves money
 - Fit parts to plate or object
- Favorites Toolbar
 - All your most used icons in one place
- Computip
 - A built-in utility to suggest the proper tool for your application
- Job Timer
 - Keeps track of job creation time
 - Displayed on edit screen & stored with job in notes/information
- Tool Simulation
 - Quickly determine if selected tool will fit into an area at a certain depth
 - Useful when using “Toolpath by color” 2D Fill
- Powerful Measurement Tools
 - Area
 - Perimeter
 - Dimensions
 - Angles
 - Bounding Box
 - Quickly determine limits and extents of selected objects
 - Useful for alignment of irregular objects
- Barcodes
 - Wizard driven
 - Quick and simple
 - Integrated into GS for rotary and laser engraving
 - Linear: EAN, UPC, Code39, Code128, 2 of 5, UPCA

Go online for the most up-to-date catalogs - Materials, Engravables, Fonts...

- 2D: Data matrix

 - Status bar
 - Shortcuts can be changed
 - Integrated spell checker in several languages
 - Display contour order and engraving direction arrows
 - Font selection shows selected text in font preview
 - Large descriptive fly-out for CAM toolpath
 - Mouse middle button programming
 - Post-it type note for each job
 - Calculates optimal number of plates that can be engraved based on plate orientation
 - Open file dialog shows thumbnail & notes
 - Shows important information about your job setup based on your settings
 - Floating origin saved with job
 - Saves floating center and floating corner origins
- Saves origins for all machines defined in job
- Provides increased automation when using custom fixtures
- Reduces errors since operator no longer needs to key in data once saved with job
- Detection of loop, duplicate objects and overlapping points
 - These geometry problems can create toolpath errors
 - Loop eraser
 - Great time saver
- Job quotation and costing module
- Computer aided machining (CAM) module
 - Easy to use
 - No limitations
 - New tool data base
 - Can define your own groups
 - Hierarchical structures
 - Quickly generate and confirm toolpaths
 - Powerful simulation
 - Reduces errors, saves material, and increases production
- Long plate (X or Y, depending on the machine)
- Shadowing effect to make 3D effect based on 2D engraving
- Script / macrolanguage for automation
- Vectorial textures for design effect on any shape
- Advanced toolpath strategies (
 - 2 1/2 D
 - 3D Intaglio & Prismatic Letters

GravoStyle™ 3D CAD/CAM Software

3D CAD/CAM solutions for sign making, woodworking, 3D-engraving and embossing.

Powerful, yet easy to use, GravoStyle™ helps you convert your 2D artwork to 3-dimensions in no time. Packed with 2D features and 3D modeling tools, you will be able to win more business, thanks to GravoStyle™ wide range of tools such as :

- Parametric technology (unique)
- Sweeping wizards
- 3D texturing
- Realistic rendering
- Tool tester
- 3D-clay sculpting
- Male/female
- Grayscale to 3D (& vice-versa)
- Bas-relief enhancement tool
- Sculpted 3D plaques
- Surface tools (for free-form designs)
- Wrapping on 3D
- Duplication & distortion
- Celtic-type design tool
- Roughing, semi-roughing & finishing strategies
- 3D tool sequences
- Cutting tool creation wizard
- 3D video simulation
- ... and lots more

**Call us at (800) 843-7637
for more information**

Developed with the latest technology, GravoStyle™ runs any CNC machine (milling centers, CNC routers, laser machines, waterjets) up to 4 axis. Its CAM module offers a wide range of machining strategies that addresses the challenges of the most exigent machinists.

STAY CONNECTED

Gravograph is happy to invite you to follow us on all our Social Network and get the latest news, events, videos & great savings! Make sure you are served up-to-date information and opportunities as they occur.

Don't wait, visit www.gravograph.us and connect!

MANUFACTURER-DIRECT SERVICE

To complement our extensive product offerings, we offer manufacturer-direct service. This service is complete with equipment protection plans, training and customer support.

Training

Engravers Academy, online or on-site

Basic Engraving – Learn the basic tools of GravoStyle™

Advanced Engraving – Learn the advanced tools of GravoStyle™ 98 and GravoStyle™.

Scan & Vectorize – Expand your possibilities with the power of GravoStyle™ 98 and GravoStyle™ scanning and vectorizing option.

Laser Engraving – Learn how to fully utilize your GravoStyle™ software to maximize the efficiency and productivity of your laser engraving machine.

iHelp: Internet Based Training

Through live interaction using the internet, our professional instructors will walk you through your favorite programs, covering tips and tools necessary to increase your productivity, creativity and knowledge.

On-site training

Receive one-on-one training on your premises by trained members of our staff.

Customized Training

Spend a few days with us at our fully equipped showroom or have us come to your location for hands-on experience with one of our corporate trainers. We will create specific solutions suitable to your needs. With everything at arm's reach (machines, accessories, materials, etc.) you can often streamline training and problem-solving processes in a shorter time period.

Customer Support

On Site Service Technical Support

Our toll free technical solution source is fully staffed 5 days per week, with extended hours to meet your needs.

Online Knowledge Base: Internet Based Training

Explore our online customer support center for self-help instructions on a range of topics. View tutorials to assist you in gaining a better understanding of topics ranging from simple to complex.

Depot Repair

Duluth, GA, Santa Fe Spring, CA and Ontario, CAN factory direct depot repair service.

Equipment Protection Plans

The Silver Plan

This plan covers travel, labor, all parts (excluding belts), and unlimited on-site visits including one preventive maintenance tune-up per year.

Bronze Protection Plan

Also known as the "Handyman Plan," you can receive any parts required for self-installation. All parts excluding belts are included. Customers also receive a 30% discount on a preventive maintenance tune-up during the contract period. Labor and travel are billed at 20% off the list price.

50/50 Protection Plan

Offers full protection with less risk. This plan covers all parts, travel and labor. A 50% payment is required upon establishment of the contract. The additional 50% is required only if a part or on-site visit by a technician is required within the one year contract period.

For more information on any of the above, please call 1.800.843.7637 or visit www.gravograph.us

A global leader in the engraving and permanent marking industry, Gravograph's many subsidiaries and distributors/agents around the world offer a complete and worldwide engraving solution to their customers, coupled with unparalleled customer service and support.
