

Metal Badge Frames & Magnets

Plastic for rotary engraving

Similar to the badge frames, but with slightly larger dimensions and upgraded finishes. The gold badges are actually 18K gold-plated, and the silver badges are plated with stainless steel. Since they both have a solid steel core, magnets adhere directly to the body of the badge, with no need for a pressure-sensitive steel plate. Sold with or without pin back fasteners. Both sizes offer round corners. Plain frames do not include fasteners, and can be used with the magnetic clips sold below. Insert material must be 1/32" thickness only.
